[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Data Engineer with experience in designing and optimizing cloud-based data pipelines, ETL workflows, and analytics platforms across Azure and AWS environments. Experienced in Spark, Databricks, Snowflake, Azure Data Factory, and CI/CD pipelines, with proven success delivering migration, automation, and data warehousing solutions for enterprise clients including Coca-Cola and NHS Scotland. Recently graduated with an M.S. in Data Science from the University of Maryland, College Park.

TECHNICAL SKILLS & CERTIFICATIONS

Programming: Python, SQL, PySpark, Shell, PowerShell, DAX

Data Engineering: Spark, Hadoop, Hive, Kafka, Airflow, Databricks, Informatica, ADF, ETL/ELT

Cloud & DevOps: Azure, AWS, Azure DevOps, Docker, Kubernetes, CI/CD, Git

Databases: Snowflake, PostgreSQL, MySQL, Oracle, Cosmos DB

Analytics/ML: Power BI, Tableau, SSAS, TensorFlow, PyTorch, NLP

Certifications: AZ-900, AZ-104, DA-100

WORK EXPERIENCE

Associate Consultant (Data Engineer) | Apr 2022 – Jun 2024

Capgemini, Bangalore, India

- Designed and maintained cloud-based data warehouse solutions for **Coca-Cola**, improving sales data management efficiency by 30% and increasing pricing data availability by 50% through optimized ETL and reporting workflows.
- Led **Oracle-to-Snowflake** migration for **NHS Scotland** using AWS DMS and S3-based ingestion pipelines, reducing manual intervention and migration wait times by 30%.
- Developed a **Python-based Informatica migration accelerator** that converted PowerCenter XML/JSON logs into structured Excel outputs, reducing manual migration workload by 40% for internal engineering teams.
- Optimized Spark, Databricks, Azure Data Factory, Informatica, and Airflow ETL workflows by tuning transformations and orchestration logic, reducing data processing time by 25%.
- Implemented Azure DevOps CI/CD pipelines to streamline deployment and improve release reliability. Developed analytical datasets and automated reporting workflows using Power BI, Tableau, SSAS, Snowflake, and relational databases to support business intelligence and operational decision-making.

Senior Analyst (Cloud Developer) | Nov 2020 – Apr 2022

Capgemini, Bangalore, India

- Developed and deployed cloud-based applications across Azure and AWS environments while maintaining security compliance and high availability across production, development, and UAT systems.
- Managed cloud infrastructure monitoring, deployment workflows, and access controls, improving operational stability and minimizing downtime for end users and internal teams.
- Automated recurring cloud operations using Azure Logic Apps, PowerShell, and Shell scripting, reducing manual support effort and improving operational efficiency.

PROJECTS

Real-Time E-Commerce Analytics Pipeline | June 2026

- Developed an end-to-end streaming analytics platform using Apache Kafka, PostgreSQL, Python, and Docker, processing real-time e-commerce events from 500+ simulated users and enabling business intelligence reporting across revenue, conversion funnels, and customer behavior. [Link](#)

PronounceAI | March 2026 – May 2026

- Developed an end-to-end pronunciation learning application using **Python, FastAPI, Whisper, wav2vec2, CosyVoice 3, and Docker**, providing real-time phoneme-level feedback, accent conversion, and voice cloning to improve spoken English proficiency. [Link](#)

CareFlowAI | Sept 2025 – Nov 2025

- Built an AI-assisted healthcare operations platform that automates patient request triage, priority classification, and care workflow management, enabling faster identification of high-priority cases and improving operational efficiency through intelligent decision support. [Link](#)

Additional technical projects available on Portfolio and GitHub.

EDUCATION

• Master of Science in Data Science | **Aug 2024 – May 2026**

University of Maryland, College Park. GPA – 3.83/4

• Bachelor of Technology in Electronics and Communication Engineering | **Aug 2016 – Jun 2020**

National Institute of Technology, Calicut. CGPA - 7.79/10
